SUMMARY

Started my programming journey 1 year ago with Java at Apna College(Alpha course). Explored web development, from Apna College(Delta course) creating small projects along the way. Embraced Flutter development 7 months ago and crafted some impactful projects, which you can explore in my repository. 🌱 Always eager to learn and explore new technologies. Passionate about creating solutions that make a difference.

EDUCATION

Bongaigaon College, Bongaigaon
Bachelor of Commerce with Management
2020- 2023

Higher Secondary
Kendriya Vidyalaya, New Bongaigaon
2017 - 2020

SKILLS

- Flutter
- JavaScript
- HTML
- Dart
- Java
- CSS
- GETX
- Communication and interpersonal skills
- Ability to work independently and as part of a team
- Detail-oriented and able to handle multiple tasks simultaneously

CERTIFICATIONS

Flutter & Dart - The Complete Guide (Udemy).
Delta - Web Development (Apna College).
Alpha - Java (Apna College).

PROJECTS

Storytelling App using Flutter

- **Firebase Authentication**: Secure login and authentication powered by Firebase.
- **Firestore Database**: Seamless data management, including saving, updating, and deleting user data.
- **Flutter Framework**: Delightful user interface with smooth animations and intuitive navigation.
- **GetX State Management**: Effortless management of app state and navigation between screens.
- **Comprehensive Authentication Flow**: Complete authentication flow, including login, signup, forgot password, and verification screens.

E-commerce Application

- **Firebase Authentication**: Secure login and authentication powered by Firebase.
- **Firestore Database**: Seamless data management, including saving, updating, and deleting user data.
- **Flutter Framework**: Delightful user interface with smooth animations and intuitive navigation.
- **GetX State Management**: Effortless management of app state and navigation between screens.

WhatsApp UI Clone

- **Flutter Framework**: The project utilizes Flutter, a versatile and powerful framework for cross-platform app development.
- **GetX State Management**: GetX is used for state management and navigation, offering a lightweight yet robust solution.
- **Interactive Screens**: Explore Home, Updates, Community, and Calls screens and many more.
- **Learning and Challenges**: Experience a journey of discovery and growth, overcoming obstacles and mastering complex concepts in Flutter development.

FoodHub Application

- **Flutter Framework**: The project utilizes Flutter, a versatile and powerful framework for cross-platform app development.
- **Signup Operation Implementation**: Successfully implemented the signup operation.
- **Figma-Inspired UI Design**: Drew inspiration from Figma's design principles to craft stunning UI layouts.
- **Firebase Backend Integration**: Currently configuring the backend using Firebase to enable seamless data management and enhancing the app's functionality and user experience.
